Rotathene®

Premium Rotational Moulding Powder For The Tank Industry

We are all aware how the air we breathe and the environment we live in contribute to our overall health and wellbeing, but do you know what chemicals your rotational moulding powder contains and how they affect you and your environment?

Many pigments are produced from materials known as “heavy metals” such as Lead, Cadmium & Chromium, thanks to their ability to produce vibrant colours. However, these metals, even in relatively small concentrations, are toxic both to humans and the environment.

Although there are no regulations in place governing or restricting the use of heavy metals in pigments, Vanglobe has made the decision to develop and use only heavy-metal free pigments for our tank grade colours. The costs involved in research, development and colour matching to ensure our new pigments match the colour of our old, heavy metal based, pigments have been substantial but we feel that it was a worthwhile cost and are proud that Rotathene® rotational moulding powder has been heavy metal free in all tank grade colours since 2007.

In today's environmentally conscious world, make the green choice and use Rotathene® heavy metal free powder!

Reliability and Durability

Rotathene® has been specifically designed for polyethylene storage tanks and has a proven track record of exhibiting excellent impact strength and long-term physical properties

UV Protection

Rotathene® 11UV provides maximum protection against harmful UV rays

Safe Drinking Water Storage

Rotathene® tank colours have been certified by the Australian Water Quality Centre to AS/NZS4020:2002, the Australian standard for drinking water

Algae Prevention

Rotathene® tank colours are formulated to exclude sunlight, preventing the growth of algae

Food Grade Material

Rotathene® complies with AS2070 Parts 1 & 8, the Australian standard for food contact

Heavy Metal Free

Rotathene® contains absolutely no toxic heavy metals in any of the tank grade colours. Safe for you and our environment
